

AVID begins January 24, 2012!

Akron Digital Academy has been working diligently to implement strategies that work to transform our schools, provide greater opportunity for our students and increase the pipeline of talented graduates to the community.

As part of that plan, ADA applied for and won a grant for the AVID College Readiness System. The AVID program will close the achievement gap by preparing all students for college readiness and success in a global society. Twenty-six students have been identified for the first semester of the program beginning January 24, 2012. The students have agreed to the rigors of the curriculum and are excited about the possibilities AVID will provide.

Check ADA's website soon to find out more information about AVID and how your student might qualify.
